**Accommodations**
Arlington Inn  
South Hwy 14 & 81, Arlington, SD  
605/983-4609

---

### Sale Day Invitation and Auction Information

Cattle are available for viewing anytime, all year round. This year we are pleased to present our Sale right here at Cotton Angus. On Sale Day, cattle will be displayed right here on the farm and you are invited to join us that morning to have plenty of time to view the cattle and visit with John, Erika, Tom and Bill. Our BBQ lunch will be ready to serve at 11:30. Come hungry! The Sale will begin promptly at 1:00 PM CST.

While no animals will be run through a sale ring, our live Auction will progress through the Lots using pre-recorded videos of each Lot over several large LCD televisions inside the sale tent while you bid in the same traditional fashion. For Buyers who cannot join us in person, we invite you to bid using our Conference Call service or the online/internet option through DV Auction. Directions for those services are included herein.

### Terms & Conditions

Cattle will sell under the standard Terms & Conditions as adopted by the American Angus Association. All cattle must be paid for the day of the sale. Terms are cash, check with proper identification, or credit card with a 3% processing fee.

### Insurance, Delivery & Housing

Every sold animal remaining at Cotton Angus after the sale will be insured at Buyer’s cost using the mortality insurance available at the Clerk station on Sale Day. Bulls that are paid for and taken on Sale Day will receive a $50 discount. Any animal remaining at Cotton Angus after April 30 will be charged $3/day until the animal is either picked up or delivered. Free delivery is offered to destinations within a 150 mile radius of the farm.

### Retained Interest

Unless otherwise stated in the sale book or announced from the sale block, a 50% semen interest will be retained by the sellers on each bull selling. The buyer receives full possession and full control of the bull (including salvage value). At some time in the future, if semen sales become a possibility (as many bulls are “discovered” as older bulls), the buyer and seller will share in semen sales on that bull. This semen interest transfers along with the bull should you sell the bull at a future date.
Conference Call Bids
For those wishing to bid by conference call, we will have a line set up on Sale Day. The procedure is as follows:

1. Between 9am-Noon on Sale Day, pre-register by calling Kooima Clerking Services at 605/690-7151. You will be asked for contact information to establish a Buyer Number.
2. 5 minutes prior to sale time (1:00 PM CST), dial 605-874-6338 and when prompted, enter the conference identification number: 21777
3. Once you are connected, Tom Ollerich will be your link to the auctioneer.
4. To bid, indicate your Buyer Number and your bid will be relayed to the Auctioneer.
5. We ask that everyone refrain from any other conversations during the conference call.
6. Should you have technical difficulties, please call John Cotton, Bill Doyle, or any of the Sale Consultants or Sale Staff noted in the catalog for assistance.

Watch & Bid online for FREE!

Can’t make the sale?
Let DVAuction bring the sale to you!

Busy during the sale?
Let DVAuction represent your bid!

Visit www.dvauction.com and Register!
It’s as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the “create new account” tab

2. Apply for bidding by clicking “apply for bidding” in the upper left corner of your screen, at least 24 hours prior to the auction

3. Tune into the sale and make your purchases!

For General Questions Please Contact Our Office:
(402) 316-5460 or support@dvauction.com

*High Speed Internet Access Required
Dear Friends,

Welcome to our 14th Annual Production Sale! We’re excited to host the sale at the farm, the very first time in our 49 years of breeding cattle. Technology has allowed us this ‘home court’ advantage. Check out www.cottonangusranch.com to view videos of the cattle weeks in advance of the sale!

Consider these thoughts:

**Fertility and Maternal Instincts trump any EPD #s the cattle industry has embraced.**

If she can’t get pregnant & raise a calf, what then is the value of $B? CW? Good breeders experience <1% open females. If you struggle with a higher percentage, you’re reading the right catalog. We can help.

**Line breeding is like a round pen: there’s no corners to back into.**

You don’t have to be a Geneticist to understand that single trait selection only brings you into a juvenile game of Chutes and Ladders or Whac-a-Mole. This program designs females who are in production for over 15 years, which requires structural soundness, fertility and maternal instincts.

**We’ve been line breeding since 1965 so the conditions reveal themselves at my house, not yours.**

Why be burdened with managing conditions when you can choose a good breeder who eliminates conditions? As a breeder with a conscience, I am dumbfounded to see that ½ of the back side of every registration paper is devoted to Genetic Condition Codes and Descriptors so that the industry can do a better job of “managing the incidence of genetic conditions”. It should be criminal – not acceptable – to pass along known conditions in any way.

**We breed cattle, not numbers.**

If breeding could be reduced to numbers, I’d leave it to a 5th grader to manage. Are You Smarter than A Fifth Grader?
I have the best fun traveling to customer’s ranches, learning about their programs, seeing how Cotton Angus genetics influence those programs over time. If you’ve never purchased from us, I encourage you to come and see our program. Videos and pictures in a catalog only reveal so much. We know the investment goes well beyond the price you might pay for an individual: you’re investing in the integrity of an entire program, from the animals to the crazy guy making the breeding decisions that move this program forward. I take your trust seriously.

Which brings me to my great customers who continually return to Cotton Angus for their seed stock. I so very much appreciate your ongoing loyalty…it validates my breeding decisions and the passion I have for the work we’re doing. Thank You for trusting in this program.

And to our children – Erika, Thomas and Rachel – your hard work and young ideas influence where we’re headed, these are exciting times. Our friends are many, we’re so thankful for each and every one of you. We are richly blessed; our cup overfloweth.

Join us for lunch in the tent at 11:30! We’re looking forward to sale day because it means we will get to see you. Call me anytime. 605/690-4287

- John Cotton
Margaret of Volga 0507

DOB:  Reg. No:  15178651  Tattoo

507 boasts a CI of 11@362 days, with a WR of 9@110 and YR of 9@110. What makes her even more special? For starters, she's an Alap daughter out of a double-bred Leonid and double-bred 149.

This exceptional female is showing no signs of slowing down. I am offering her as a flush because I want her to have the possibility for as many progeny as possible. So many of you have asked about her and expressed interest…this is the best way I can think of to share her but not sell her. She's been so important to the success of Cotton Angus and I'm passionate and confident in the benefits she can bring to your program.

Flush Terms and Conditions:
Guaranteeing six Grade 1 embryos out of Margaret of Volga 0507 (AAA 15178651) flushed by a mutually agreed upon technician local to Cotton Angus. Buyer supplies the semen at their cost including shipping. Cost of Flush is at the Seller’s expense. Embryo Transfer is at the cost of the Buyer, including insurance and shipping from the Flush facility. Any additional Embryos will be offered to the Buyer and can be purchased by the Buyer at the prorated price. Buyer forfeits all interest in Embryos that are not purchased by the Buyer. Guarantee includes 3 successful pregnancies if transferred by a certified technician. Flush will be available after April 30, 2017.
Let’s take a look at her successes as a producer these past years:

- Her first calf was a Legend offspring, purchased by Triebwasser Farms and still working hard as a 10 year old, as expected.
- A year later she gave birth after a full sib mating… I named her bull calf Mojo of Volga, and have use him extensively in my herd. He has 25 daughters in production and is Aberdeen Angus through and through.
- The 3rd year, I decided to do another full sib mating with Moofassa and we celebrated with the birth of the 901 calf who has been a tremendous cow and still having babies.
- We welcomed her bull calf Maxamillion of Volga who is my self-made Leonid son. Max has fathered so many great bulls and females alike. Bred back to 9 of his own daughters, proving out the absence of conditions. This bull proves his worth every year, and his females have perfect udders, feet and legs.
- The 5th year, her calf dies of coccidiosis according to the SDSU Diagnostic Lab. Thankfully, I put 753’s freemartin twin on her and she did a great job raising him, didn't skip a beat. The freemartin was delicious by the way.
- Breeding back right on time, she gave birth to her 6th calf, a big nutted, highly productive Larkan son who I sold to Triebwasser Farms. That bull is still in use and excelling at 5 years of age.
- 507’s next calf was a bull calf I named Midland of Volga, a son of Rito 36. This bull is like none other in the history of Cotton Angus. He matured at 2450#, and notably adds stretch and bone yet gives the femininity from his mother to his offspring. (semen available)
- Her 8th pregnancy delivered Masterpiece of Volga, an E31 son. He went all sorts of crazy with a weaning index of 124 and a yearling index of 112. Masterpiece was sold to Mike Langbehn on our production sale in 2015 for $15,000. Masterpiece is popular, has calves in 7 herds to date and growing. He’s producing awesome big gutted cattle that will have impressive longevity. (semen available)
- Her 9th bull calf was sired by Rambler of Volga. Named McCombie of Volga, he’s our freshest son in our program. I will be passing out cigars this spring to celebrate the arrival of his first calf crop. I have every confidence he’ll meet or exceed my expectations and am just giddy to get daughters in production!
- 507’s 10! 10! 10th Calf in the spring of 2016 was FINALLY a heifer, and an E31 daughter at that. That heifer weaned at 618# and indexed 122. What on earth will I breed this little beauty to? Stay tuned!!
- And could this be a new trend?? Her 11th calf was again a pretty little E31 daughter that I’m just as jack’d about as her full sister from last year. I hope you’re as excited as I am!
### Baltimore of Volga 1617

**Traveler Tip #1:** If you're flying out to Wye, know there are 2 airports, Baltimore Int'l and Reagan Int'l. There is a difference, and a big difference with this heifer bull, Baltimore of Volga, is the power structure he offers and the sheer look of masculinity (a.k.a. Big Balls). Pedigree boasts triple bred Alap (no conditions!) and double bred to Larry Leonhardt's Blackbird line with a 76#BW/558#WW/865#YW. His Dam's CI is 7@365. You're heading to the right airport with this Lot!

This modern, big bodied heifer bull is easy keeping, and not a fussy eater, he's the first one at the bunk. 75#BW/584#WW/885#YW Pedigree reveals Alap-Billy-Buckeye which means proven, solid calving ease. As we all know, only 1 buyer goes home with this outstanding bull. As Mr. Ed VanderWal would say, “That's the BUNK!”

Hiefer bull but he’s a dog! This is the only Camas of Wye bull we’re selling. Huge nuts like his paternal grandfather (Luthien of Wye which dates back to 1978 Cotton Angus historical records). Seriously, this bull is driven. Libido level will send him through 2 barn walls to screw the girls. 68#BW/598#WW/918#YW. Dam’s CI of 2@360 and she weaned 51% of her body weight. You don’t find performance like this everywhere, cattle-men!

Moofassa of Volga 0432  Margaret of Volga 0507  Alap of Wye UMF 8329  Lucy of Volga 0447

Let's talk dam: the proven 370 with 12 @ 96 and 11 @ 100…13 calves @ 364 days…she's a workhorse and not slowing down anytime soon. This is the first bull calf I've ever offered as a yearling from her. Paternal line boasts triple bred Alap and Viking influence. Such unique breeding that proves he's Condition Free. True Aberdeen genetics, retaining ½ semen interest on this Lot. Phenotypically, he fits the part. If you value maternal instincts and longevity, this bull is one you can build a herd on. Highly recommended by John Cotton.

Churchill of Wye  Lodge of Wye  Colleen of Wye  Matson of Volga 2006  Alonna of Volga 9839

The Great Balbino! One too many beers during The Sandlot. Churchill, Beaugian, Big Don…all the good stuff. Real athletic looking, big backed bull. 81#BW/WW585@106/YW995@112. Dam's CI 3@355/WR 2@107/YR 1@112. No kidding, she weaned 62% of her body weight. This bull is a super heifer choice – good footed with a clean front.

Stout framed, masculine head, lots of libido and the ladies already love him. 80#BW so put him to work on heifers. Dam shows 6@355, WR 5@103 and YR 2@104. Weaned 51% of body weight as a 6 yr old cow. Solid work horse all the way around in this Lot. Out of Lodge of Volga with Leonid influence. Nice offering to help you sleep at night during calving.

John had Justin Bieber in mind rather than any other sort of beaver he could have been imagining. Bieber came out Beaver in this case. Seriously though, we're talking Lodge of Volga, Churchill and double-bred Manning which is no joke: solid genetics. Total cow bull. 108 WI...looks like a stud, struts his stuff, never sings about heartache, and will put pounds on your calves in the fall.

“He IS the performance bull,” says John. WW 658@119 and YW 1029@116. Good in his rib and big backed. It’s the Rito blood you’ve been waiting to bid on. Lio has stretch and eye appeal for the buyer and the ladies in the cow pasture. Will produce pounds of calves in the fall, and John the Cow Boss recommends, “Be sure to keep the heifers as replacements!”

  - **Margaret of Volga 0507**  
- **Blackbird of Volga V101**  
  - **Evergreen Lodge 006T**  
  - **Blackbird of Volga 0906**

Want to understand an animal? Study the parents. This bull’s mother weaned over 60% of her body weight for the last 4 years in a row. CI 4@361/WR 4@108/YR 4 @105, proof she’s a hard worker. Use Bear in your cow pasture. Good looking & sure footed. Structurally sound with all the maternal instincts you can buy, this Lot is sure to show gains in your calf market.

## Malaki of Volga 1642

**DOB:** 2/27/16  
**Reg. No:** 18668691  
**Tattoo:** 1642  
**BW:** 82  
**WW/WW Ratio:** 595 / 108  
**YW/YW Ratio:** 875 / 99

- **Rito 206 of Ideal 2218**  
- **Midland of Volga 1353**  
  - **Margaret of Volga 0507**  
- **Margaret of Volga 1015**  
  - **Buckubrew of Volga 0813**  
- **Margaret of Volga 0857**

Named with Hawaiian influence, Malaki’s pick up line is, “Com’on-a-wannahlayya”. So correct in form and function, attractively long-bodied. Croons Don Ho songs over the fence. Out of John’s favorite bashful, introverted, timid Pathfinder cow at the feedbunk who’s loving and motherly toward her calves…weaned 6 @ 363 days. Out of Rito 36/Alap/Cedric/Big Don – all mainstays in Cotton Angus history. Solid maternal genetics throughout this Lot.

Margaret of Volga 1243
Margaret of Volga 9961

Very attractive 2-yr old Avagadro daughter. Nice level udder, medium framed out of a Britt daughter that is one of the 2 prettiest cows I’ve ever come across. Going back to my last Callao daughter 9961 who died this winter…pregnant at 18 years of age. 9961 had a CI 16@359 days, weaned 16 calves with a combined weight of 9174# in her lifetime! Mix that with 0370…Longevity and performance. This is a no brainer.

Sells with a 4106 (Billy’s 7/8th brother) heifer at her side.

This sexy 2 year old goes back 5 times to Larry Leonhardt’s Blackbird 28-46 cow, 9 times to E31 and also 4 times to Manning…no wonder I’m struggling to figure out my EBVs! Line breeding at its finest. This is really a unique lady that you will take a lot of pride in owning, she’s a beautiful 311 daughter just like all the rest of them…my only critique is that she has short ears, but they’re a long way from her ovaries. Her mother, 3531, is a young cow with a CI of 3@364 days. Gooooood geneticals right here.

Sells with a 4106 (Billy’s 7/8th brother) heifer at her side.

Good ol' Wye genetics coupled with Cotton Angus Margaret's, this gal was built to make babies. She'll have a neatly shaped, tight udder – everyone can think of that one cougar who still has it going on – 673 will be that cougar! The maternal grandmother went out of production at age 19. I'm keeping all the other Camas daughters because I'm selfish. Lot 39 is quite an offering.

Attractive, sound female going back to the Margaret line that has been my herd's mainstay for over 50 years. Where else do you find this kind of breeding? In Pamela Anderson's history? I think not – it's about quality, not quantity! Mother is a 1270# brood cow with a beautiful level udder, makes me giddy. Alap/Coburn/double bred Manning round off this Lot's bragging rights.

**Barbara of Volga 1628**

DOB: 2/24/16  
Reg. No: 18668706  
Tattoo 1628

- BW 73
- WW/WW Ratio 590 / 112
- YW/YW Ratio 818 / 108

This sexy specimen is wedgy, one of my absolute favorites out of Sam Wylie's Deliah's line, and her mother is one of my favorite cows. Rito 36/Alap/E31 and 41/97. Very difficult decision to put her on the sale, she looks so much like her mother. Her mother's udder is voluptuous. Enough said.

Masterpiece of Volga 1460  
Margaret of Volga 0507

Another short gestation Masterpiece calf, she's deep sided and very smooth. Had a WI of 117 out of a first calf Lodge of Volga heifer who weaned 59% of her body weight AND she bred back with a CI 2@270. BAAM! All the usual suspects: E31/Alap/Lodge of Volga/Rambler. If you want productivity and longevity, you’ve come to the right sale.

An exciting result of breeding Billy to Billy's brother out of Billy's sister. If your seed stock breeder doesn't prove his genetics this way, he should be. Outcross Bond James Bond calves and just SEE what happens. Outstanding calving ease, you could build an entire cow herd around this bull.

Introduced to my herd in 2011, he's an Alap son out of a productive Matson daughter. I chose this bull for 2 reasons, his mother – his females on the ground are just top notch – and the 2nd because he's stretchy and thick, like a propane tank with legs. Really like everything about his bull. Co-owned with The Hat Ranch, Coon Rapids, IA.
