“The Wye Angus Beef Program has worked extremely well in the University of Maryland dining rooms. Students ask for Wye Angus Beef and line up when it is served. From Burgers to Prime Rib the beef has great flavor, tender and the quality that can’t be compared.”

**John T. Gray
Sr. Executive Chef
University of Maryland
Dining Services**

This year we are pleased to present our sale in person again and using video projection. While no animals will be run through the sale ring, the cattle will be just outside the sale barn for your viewing prior to and throughout the sale.

Saturday April 2nd, 2022 12:00 PM EST

Holiday Inn—410-827-4454

Fairfield Inn—410-822-0050

Insured by:

James F. Bessler (815) 762-2641

One-Third Semen Interest

Wye Angus is retaining one-third semen interest in several bulls with no possession. Wye Angus may, at the buyer's convenience, collect semen from the said bull for within herd or commercial use. The buyer receives two-third interest full possession of said bull and is in no way limited in activities with the bull or his semen. Either party may promote and merchandise semen from said bull. Either party may sell their interest in said bull at any time and is only required to notify the other owner that the transaction has occurred.

Wye Angus retains a semen interest in several bulls from each calf crop for use in future breedings at Wye. We offer the semen publicly through semen sales to compare the Wye genetics to the general Angus population in a wide variety of environments and management styles. It is not the intention of Wye Angus to compete with the new owner of the bull in semen sales. Wye Angus is willing to consider separate agreements regarding the promotion and merchandising of semen from said bull.

EPD'S

Are current as of February 3, 2022.

Teleauction

Phone: (888) 259-0463

Participant Passcode: 48910183 then #

For those wishing to bid by conference call, we will have a line set up on sale day. The procedure will be as follows:

1) To join the teleauction please call the Wye Angus office (410) 827-6016 no later than 11 AM Saturday morning to receive a bid number and sale order. If you have email or a fax number we can email or fax you the sale order.

2) 5 Minutes prior to sale time (12:00 PM EST), call the teleauction number (888) 259-0463 then enter the participant passcode: 48910183 then #.

3) Once you are connected, a Wye Angus representative will be your link to the auctioneer.

4) To bid, indicate your buyer number to the Wye Angus representative. Your bid will then be relayed to the auctioneer. Obviously, the potential exists for portions of the auction to occur entirely on the phone.

5) We ask that everyone refrain from any other conversations during the conference call.

Internet Bids:

Real-time bidding via the internet for this sale. Live audio and live video will allow buyers to bid on animals just as if they were present at the sale. To register and follow the auction in real time on the internet, log on to Website: <http://www.liveauctions.tv>. If you need help registering to bid or to view the auction, please call technical support at (682) 816-4900 or email TechSupport@LiveAuctions.tv.

Welcome

Wye Research and Education Center appreciates the continued support it receives from these honored guests:

Dr. Craig Beyroudy
Dean of College and Director,
Maryland Agricultural Experiment Station and
University of Maryland Extension

Dr. Kathryn Everts
Director of the Wye Research and Education Center and
the Harry Hughes Center for Agroecology.

Dr. Puneet Sriastava
Associate Dean and Associate Director
Maryland Agricultural Experiment Station

Dr. Kenneth Staver
Assistant Director of the Wye Research and Education
Center

We are excited to welcome everyone back to our 44th Annual Wye Angus sale.

After having two successful virtual sales in 2020 and 2021, we are looking forward to seeing our friends at this year's sale.

We plan to sell 7 cow/calf pairs, 7 pregnant recipients and 26 yearling bulls. The cows we are selling include 2 Alap of Wye UMF 8329 daughters, 2 Leodore of Wye UMF 10536 daughters and one daughter of Cael of Wye UMF 9933, Quintes of Wye UMF 10503 and Pellin of Wye UMF 10550. The pregnant recipients will be carrying embryos that are sired by Carty of Wye UMF 6952 out of Blackbird of Wye UMF 9787, and Lander of Wye UMF 10387 out of Lottie of Wye UMF 9634. The 26 yearling bulls are uniform in their type and performed very well on their 140 days on test.

Looking forward to seeing you on April 2, 2022.

Sincerely,

Edward C. Draper
Program Manager

Kevin W. Morgan
Herd Manager

Dear Friends of the Wye Angus Program,

The legacy of the superior Wye Angus herd continues to be a tremendous point of pride for the College of Agriculture and Natural Resources (AGNR), with its history steeped in the land-grant mission of the University of Maryland. I am excited and honored to invite you to the 44th Annual Wye Angus sale scheduled for Saturday, April 2, 2022, at 12 pm, which we're excited to once again host in-person at AGNR's Wye Research and Education Center. Since 1979, the college has taken pride in offering public access to select members of our herd.

Our Wye Angus team looks forward to reconnecting with those of you who have been regular attendees over the years, as well as meeting first-timers. This year we are pleased to offer 7 cow/calf pairs, 7 ET pregnancies and 26 yearling bulls complete with the high-quality characteristics that encompass the distinct excellence of Wye Angus.

The college is committed to its ongoing work with researchers from our Maryland Agricultural Experiment Station, Extension educators, and academic units to address challenges facing the beef industry using the Wye Angus program in areas of production as well as animal health, environmental quality, and sustainability. There is some excellent history on the program as well as research developments available on the "Wye Angus" page of AGNR's website, which we encourage you to visit.

This summer and fall we will once again offer an esteemed internship program with the Wye Angus herd, affording our students unique opportunities to incorporate hands-on learning in multiple areas including breeding, data collection, pasture management, and herd health practices. To date, more than 70 students from 12 states have participated in the internship program. Applications are open through March 1 for both seasons and can be delivered to Lisa Yoash at lyoash@umd.edu with resume and cover letter.

The University of Maryland Wye Angus program remains an international leader in production research and I hope that you appreciate the quality cattle we have produced for this year's sale. Thank you for your past support and I hope you enjoy the sale on April 2.

Sincerely,

Craig Beyroudy
Dean and Director

Wye Angus—The Early Years

Wye Plantation has been farmed without interruption since the 17th Century. One of its early owners was William Paca, signer of the Declaration of Independence and first governor of Maryland. Paca, who died in 1799, is buried at Wye Plantation. His heirs sold the property to a Centreville, Maryland family whose descendants owned it until 1937 when it was purchased by Arthur A. Houghton.

Houghton, then chief executive of Steuben Glass, employed James B. Lingle, an experienced cattleman, to manage Wye Plantation. While they had different business backgrounds, these two men had similar beliefs in quality. Houghton was determined to make the finest glass in the world, and Lingle was determined to create greater beef cattle than the world had ever known—cattle that would be great in size, fine in quality, and economically profitable.

Although Lingle had previously worked primarily with dairy cattle, he admired the production qualities of Angus, particularly the uniformity of the breed. Once Houghton and Lingle agreed on Angus as the breed of Wye, they began selecting stock for the new herd.

They started with 18 heifers and a bull calf, purchased in 1938. The 18 heifers are all the females that Wye Plantation has ever purchased. Twelve of the cow families they represented are still present in the Wye herd today. The bull calf, Blakeford Buxton, was a combination of Earl Marshall and Blackcap Revolution breeding.

Lingle searched for cattle with larger than usual frames. He knew that the larger, taller animals had a “rangier” chassis on which to hang more meat without any sacrifice in carcass quality. His first heifers all proved to be consistent breeders, good mothers, satisfactory milkers, and were blessed with longevity. Outstanding among the first 18 Wye heifers was Capearl #82 who dropped her last calf at the age of 18.

Naming of the Wye Herd

There are ten families left here at Wye. These family names include Florelle, Lullaby Lottie, Pride of Aberdeen, Queen Mother, Alexina, Ballindalach Blackbird, 2nd Br. Blackbird, Clova, Golden Madge and Miss Copeland.

The Wye cattle are named by following the maternal side of the pedigree. The cows are registered using the actual family name followed by their ID number (ex. Lot 1 is Clova of Wye UMF 10836). The bull names are picked using the first letter of the family name followed by their ID number. (Ex. Alap of Wye UMF 8329 comes from the Alexina family). The (UMF) included in the name which stands for University of Maryland Foundation was added to all cattle born after the University of Maryland Foundation was gifted the herd in 1978.

Scottish Influence

At the time Wye's herd was beginning, American breeders were raising Angus according to the standards then dictated by the show ring—small, compact, “baby-beef” type animals. Lingle wanted large-framed cattle, and he noticed the great size of Scottish-bred cattle. He particularly

liked the “growthiness” of Scottish bulls.

Consequently, in 1941 and 1946 respectively, Wye added two Scottish-bred bulls to the herd. These were Juryman of Wickwire and Puck of Wickwire, both imported to the United States “in dam” from Scotland and born at Wickwire Farm, owned by George Bailey, of Earleville Maryland.

In 1957, Lingle made a trip to the British Isles in search of more big-framed bulls to add to the Wye herd. His purchases included bulls from Scotland, Ireland, England, and Wales. Among these bulls was Imp. Prince of Malpas from the famous Harviestoun herd in Scotland. Prince was a bull of great proportion who sired some of the most feminine females developed at Wye Plantation during the 1960's. He also sired some high performing sons that met with considerable demand. Other imports included Jai of Frampton from Wales, noted for his tremendous muscle expression; Valour of Ardrass; and George Swiftbrook were sons of Prince Paul of Barnolby from Ireland and both bulls were of exceptional height, length, and overall frame. A total of 25 bulls were imported from the British Isles by Wye Plantation between 1941 and 1959. Since then no outside or “new blood” has been added to the Wye Angus herd.

In 1979, Mr. Houghton gifted the University of Maryland with the Wye Angus herd. The private, nonprofit University of Maryland Foundation was created to accept and hold the gift for use by the University, and remains the legal owner of the herd today.

Within the University System of Maryland, the Maryland Agricultural Experiment Station was charged with managing the herd on a daily basis and it continues to do so today. With acceptance of the herd gift, the University agreed to make any animals deemed excess to research needs available for the general public in some equitable fashion. The agreement to the annual public auction of Wye Angus cattle held each April since 1979.

The University of Maryland Wye Angus Program Today

Wye Angus continues to supply grain fed and grass fed beef to the University of Maryland Dining Services.

Dr. Jiuzhou Song continues his project examining the effects of finishing cattle on an alfalfa and orchard grass diet alters the epigenetic status of genes affecting beef quality and the fatty acid profile. We have finished our sixth group of grassfed-vs-grainfed steers and Dr. Song has generated four scientific papers from this project.

Dr. Zhengguo Xiao has initiated a project involving *Ostertagia* *Ostertagi*, the most economically important gastrointestinal nematode parasite in the cattle industry. He will be comparing parasite levels in both our grain fed steers and grass fed steers.

Annual Sale

It's a Wye Angus tradition to hold its annual sale the first Saturday in April each year.

Lottie of Wye UMF 9634

Lottie of Wye UMF 9634 was in our flush program and we have sold seven of her sons. We currently have a Leonid of Wye son, Levey of Wye UMF 11329, that we are using. We also have retained three of 9634's daughters. You can see by this pedigree that we have the Alap of Wye UMF 8329 daughter, 9078, as a paternal grand-dam and the maternal great grand-dam.
