SALE DAY INVITATION

Cattle are available for viewing anytime, all year round. On Sale Day, the cattle will be displayed at the farm (21239 458th Ave. Volga SD 57071) and you are invited to join us that morning to have plenty of time to view the cattle and visit with John, Erika and Tom. The sale will again be hosted in the farm’s shop and will begin promptly at 4:00PM CST with a lunch offered prior to sale.

While no animals will be run through a sale ring, our live auction will progress through the Lots using pre-recorded videos of each Lot over several large LCD televisions while you bid either in person, through DVAuction, or on our Conference Call Line. Direction for those services are included herein.

CATALOG REQUESTS

Information found in the catalog is printable from our website: www.cottonangusranch.com. Should you wish to receive a hard copy, please call Erika at (605) 695-5155 with your address and we’ll be happy to mail you the hard catalog.

TERMS & CONDITIONS

Cattle will sell under the standard Terms & Conditions as adopted by the American Angus Association. All cattle must be paid for the day of the sale. Terms are cash, check with proper identification, or credit card with a 3% processing fee.

INSURANCE, DELIVERY & HOUSING

Every sold animal remaining at Cotton Angus after the sale will be insured at Buyer’s cost using mortality insurance of Buyer’s choice. Any animal remaining at Cotton Angus after April 30 will be charged \$3/day until the animal is picked up or delivered. Free delivery is offered to destinations within a 150-mile radius of the farm.

RETAINED INTEREST

Unless otherwise stated in the sale book or announced from the sale block, a 50% semen interest will be retained by the sellers on each bull selling. The buyer receives full possession and full control of the bull (including salvage value). At some time in the future, if semen sales become a possibility (as many bulls are “discovered” as older bulls), the buyer and seller will share in semen sales on that bull. This semen interest transfers along with the bull should you sell the bull at a future date.

CONFERENCE CALL BIDS

For those wishing to bid by conference call, we will have a line set up on Sale Day. The procedure is as follows:

1. Between Noon and 3:00 pm on Sale Day, pre-register by calling Erika Cotton at (605) 695-5155. You will be asked for contact information to establish a Buyer Number.
2. Five minutes prior to sale time (4:00 pm CST), dial (605) 874-6338 and when prompted, enter the conference identification number: **21777**
3. Once you are connected, Tom Ollerich [admin #27180] will be your link to the auctioneer.
4. To bid, indicate your Buyer Number and your bid will be relayed to the Auctioneer.
5. We ask that everyone refrain from any other conversations during the conference call.
6. Should you have technical difficulties, please call John Cotton, Bill Doyle, or any of the Sale Consultants or Sale Staff noted in the catalog for assistance.

Visit www.dvauction.com & Register!

It's as easy as 1, 2, 3...

1. Create an account at **www.dvauction.com** under the “create new account” tab
2. Apply for bidding by clicking “apply for bidding” in the upper left corner of your screen, at least 24 hours prior to the auction
3. Tune into the sale and make your purchases!*

For general questions please contact our office at
(402) 316-5460 or support@dvauction.com

Cotton Angus Ranch

Dear Friends,

Thank you for attending our 19th Annual Production Sale.

The past year has been a fun time for us because so many of our long term breeding plans are coming together.

Last summer, we used 4 direct sons of Columbus of Wye as walking herd sires.

SVR Columbus King 6125 is a straight Wye bred bull. SVR Columbus Lou 6119, 6114 and 6106 are 3 flush brothers out of Lucy of Volga 0420, a Rito 149 x Emulation 31 cow owned by Spring Valley Ranch.

John has always been interested in Columbus because of the level udders and feminine quality of his daughters.

For years, we used Manning and his son Alap to keep the genetic components of Columbus from slipping backwards in our herd. Finally, in 2018 we were able to purchase 4 Columbus sons from Spring Valley Ranch to more directly infuse Columbus into our seed stock. Now we have daughters of all 4 of these bulls in production and calves from all 4 bulls on the ground. We are excited to share these genetics with you. Using four different sons has given us the opportunity to prove out a wider expression of Columbus genes, through their recombination in four individuals. Each of these bulls transmits a different sampling of Columbus ancestry, as well as the ancestry of Rito 149 and E31. Now we must be patient as time and environment sort the results.

Snake Creek Ranch owns Columbus King and 6119 with us and these two bulls have now gone to work at in Platte, SD.

Thank you, Snake Creek. 6114 and 6106 will be on pasture again here at home.

In addition to the Columbus sons, we also have as walking sires a direct son of Prince of Malpus from SVR, a Lajos of Wye son from SVR and a Leonid of Wye son from Hyland Angus. This spring, another Leonid son, Breton of Wye, who we own with Spence Oliver, will be coming to Volga to go into Pickering's Pasture.

The Prince and Lajos influence has really complemented our maternally focused E31 and Alap combinations. We love the volume and udders these bulls are consistently reinforcing in our cows.

John has been AI'ing to Leonid since the late 1980's and Leonid influence is woven into the herd. Using two direct Leonid sons for natural service this summer is an elegant line breeding project we worked hard to build over decades.

Continuity is what we do. We have confidence in our cattle and see no advantage in changing what has worked so well for so long. This long experience has taught us the strengths and weaknesses of individual animals from the past and we constantly apply that knowledge to balanced matings and deliberate genetic selection. We believe in keeping our cattle great, so that you can depend on the cattle you buy from us. We

concentrate on maternal excellence and our core pursuit is line breeding reliable cows and predictable bulls. We want our cattle to be profitable for you over many years.

Our friend Bill Doyle retired from the cattle business last year and a young man named Wyatt James from Bruce, SD is beginning his own herd with the Doyle cattle.

Wyat's bull calves were developed beside ours so the expression of genetic potential under the same management is comparable. A selection of bulls from the cows he bought from Bill is being offered at our sale this year and next year those genetics will be folded into the production sale of Wyatt's family.

Rad and Julie Bortnam are also guest consigners at our sale this year. These 4 calves were developed at the Bortnam Ranch and the plane of nutrition was not identical to that on the other lots. We expect their performance to be similar to our bulls in the long run.

We sincerely thank those who are always so generous helping to work the cattle and prepare for the sale year after year:

Erika, Tom, Rachel, our neighbors, family and friends. Erika and Tom are busy building their own "herds within the herd" and their commitment to the future is the most satisfying aspect of our commitment to you.

Whether in person, or on the internet, or via phone— we thank you for your attendance and your continued support.

The sale will be held at the farm at 4 pm with lunch at 12 pm same as last year.

Visit DVAuction.com to view videos, and our new updated website— www.cottonangusranch.com to see all the hard work Erika has put in to improve and expand the content. Any changes to the catalog will be on the site.

Thanks again!

John Cotton and his awesome Crüe

01

Langland of Volga 2118

DOB: 02/27/21 Reg. No: 20224016

- N Bar Emulation EXT [AMF-CAF-XF]
- Lady Ida of Volga 8706
- Moofassa of Volga 0432
- Lucy of Volga 0419

2118 is a Bellaman of Volga son that goes to Moofassa 3 times and once to Moofassa's full sister 507. This mating flat out worked. There is nothing in the pedigree but great cows, including 3 pathfinders. Travels well. Long and smooth with muscular hindquarters. His dam is a first calf heifer who did a fantastic job.

76 lb heifer bull. WWR 115 and YWR 107.

- Lady Ida 92 of Volga 9810
- Moofassa of Volga 0432
- Lady Ida 92 of Volga 2024

2125 is An Emerson son. It's hard to describe him other than high class. He has a wide chest floor, a very deep body and a traditional old time Angus head. The cows behind him all have good udders and ample milk. His dam moved into the AI pasture this year. She is a pathfinder Lodge of Volga daughter with WWR of 4 at 114 and YWR of 4 at 112. CI 4 at 370.

2149 is a thick Eric son. His dam, 1734, is a pathfinder cow that goes to Lodge, Bonanza, Leonid and EXT. Her CI is 4 at 366. 2149 had a 72 lb BW with individual WWR of 119 and YWR of 112. 2149 is our bull with a +50 YW EPD! Finally we are surpassing Lodge and Bonanza. At last, we are closing in on our goal of matching the YW of Three Rivers, the Performance King of the Breed. Only 146 pounds to go! John says he will keep working on it... "NOT"

2052 is a first calf heifer bred to Masterstroke of Volga, an E31 son out of 0507. The sire of 2052 was Buff of Volga, a SVR Legendary Lou son. Legendary Lou is a maternal half brother to our SVR Columbus Lou bulls as well as a 7/8 brother to Billy. Buff's dam was a very solidly bred cow going to Lodge of Wye, Manning of Wye, Billy and Evergreen Lodge 6T. We love the way 6T commingles with the Leonid in our cows. The Lodge, Leonid, Rito 149 and E31 repetitions in 2052's pedigree will keep turning in the present mating to Masterstroke.

2112 is a Bellaman of Volga daughter out of a first calf heifer, Blackcap of Volga 1931. 1931 sells as lot 33 with her heifer calf by Margo of Volga. A careful study of the pedigrees of Bellaman and Margo would show the usefulness of owning this calf, her dam and half sister. If you want to concentrate the 0507 cow influence, here it is. The pedigree is stacked with maternal sires, E31, Alap, and Candolier Forever.

This is our first outcross bull we’ve used in about 20 years. I deviated from my usual line breeding regimen to illustrate the advantages of outcross heterosis. I bought this particular 2-year old animal because his sire’s progeny at SVR are stunning. If you want depth of body and more pounds, take a look at the bulls and heifers we’re selling out of this sire.

John purchased him from the Wye Plantation in 2016. Out of a fancy Bonanza daughter, his calves are so showy. We are looking forward to see his daughters in production!

A straight Wye bull, very correct as you would expect, has a beefy thickness to him. He'll compliment my program because of the added masculinity he boasts. This sire has Forceful of Wye in his pedigree which will help sustain our excellent udder quality. He's a solid Aberdeen Angus example and traces back to my dad's bull, Luthien, purchased in 1978.

NOTES

This image shows a full page of blank, lined paper. It features approximately 20 horizontal blue or grey lines spaced evenly apart, typical of notebook paper. The lines extend across the entire width of the page, leaving small margins at the top and bottom. There are no vertical lines, text, or other markings on the page.

NOTES

[illegible]

NOTES

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.
