Breeding-age bulls and fall-calving cows were vaccinated on 10/7/22 with Pyramid 10 for pre-breeding purposes. All adult cattle were treated with StandGuard pour-on for lice on 10/7/22. Spring-born calves were dewormed with Cydectin pour-on and have received another dose of Pyramid 10 on 10/7/22. Lots 3A and 5A were calf-hood vaccinated on 10/7/22. Fall-born calves were injected with Vision 7 on 10/7/22.

Current Health Status of the Virginia Tech Beef Herd

Our goal is to sell the healthiest cattle possible and our current health program is outlined in the sale catalog (page 2). We voluntarily test each year for Brucellosis, Johne's, Anaplasmosis, and Bovine Leukemia Virus (BLV) on the sale cattle in an attempt to maintain a high standard.

Our goal is to be transparent as possible with the quality and health of our cattle. If you have any questions about the current situation or any other health questions, Dr. Swecker is available on site to answer your questions.

As always, we appreciate your support of the Hokie Harvest Sale!
